Experience overview

☐ Experience with manual and automated testing

☐ Knowledge automated tests in commercial projects

☐ Knowledge HTML, CSS, Javascript

☐ ISTQB certification

☐ Practical experience with programming and algoritmization in different programming languages

☐ Overview and orientation in processes and concepts related to QA and testing

☐ Experience with SQL - MySQL database

☐ Communication with customers

Technological knowledge

Programming languages, Frameworks	HTML, CSS, SASS, PHP, SQL, Javascript, Visual Basic, Nette framework, JavaSE, Ajax, JQuery, Bootstrap framework, Webdriver, Cucumber framework
Operating systems	Window, Linux
Testing	text execution, black + white-box testing, tests FE, defect management, test web services, automated tests in HP UFT, automated test in Selenium and Appium for mobile devices(Android, iOS), ISTQB certification
Databases	MySQL, PostgreSQL, MSSQL
Other	Webservices SOAP, REST, SoapUI, JIRA, MS Office, Confluence, SQL Developer, Putty, GIT, SVN, JSON, Jenkins, Browserstack, Postman, Photoshop

Project summary

2019 - now CleverFarm

Project	Clever Assets
Description	Agricultural land management application. Contracts, tax returns, land administration and overview
Position	**QA engineer**
Job description	Preparation of test case, testing web application, creating automated tests
Used technologies	Javascript, Java, HTML, Webdriver, Cucumber framework, Linux, Jenkins

2016 - 2019 Inventi Consulting, s.r.o.

Project	Sanofi COMMA (05/2018 - 06/2019), Spinpark API & Admin (12/2018 - 02/2019), Inventi BackOffice (02/2019)
Description	CRM application used by Sanofi employees to manage customer contracts.Development of an application used to manage smart car parks. Development of an application to test the Spinpark project.

Position	**QA engineer**
Job description	Creating a test case, web application testing, hardware testing, performance tests, frontend development
Used technologies	Jira, Slack, Putty, SQL, Linux, testing tools, HTML, CSS, Bootstrap framework, Javascript
Project	Sanofi COMMA (05/2018 - 06/2019), Spinpark API & Admin (12/2018 - 02/2019), Inventi BackOffice (02/2019)
Description	CRM application used by Sanofi employees to manage customer contracts.Development of an application used to manage smart car parks. Development of an application to test the Spinpark project.
Position	**QA engineer**
Job description	Creating a test case, web application testing, hardware testing, performance tests, frontend development
Used technologies	Jira, Slack, Putty, SQL, Linux, testing tools, HTML, CSS, Bootstrap framework, Javascript
Project	Openmatics (05/2018 - 06/2019)
Description	Development of an application providing delays notification and statistics for municipal buses
Position	**Tester**
Job description	Preparation of test case, testing web application, hardware testing, performance testing
Used technologies	Jira, Slack, Putty, SQL, Linux command line, testing tools
Project	ČSOB(06/2018 - 09/2018)
Description	Automated tests for mobile devices(Android iOS).
Position	**Programmer, Automated tester**
Job description	Creating automated tests, preparation for run script in different environments
Used technologies	Java,Maven, Selenium, TestNG, Appium, Browserstack
